Education

Galgotias College of Engineering and Technology

B.Tech in Artificial Intelligence and Data Science; CGPA: 7.75

BMVB-ASMA, GK-2 (CBSE)

Class XII: 90%; Class X: 92.4%

Greater Noida

2024 – Present

New Delhi

Experience

Prodigy InfoTech

Data Science Intern

Remote

Jul 2025 – Aug 2025

- Developed machine learning solutions for data preprocessing, feature engineering, classification, regression, and predictive analytics using Python.
- Built and evaluated models with Pandas, NumPy, and Scikit-learn; performed EDA, visualization, and metric-based analysis.

CodSoft

AI Intern

Remote

Jul 2025 – Aug 2025

- Built AI and NLP applications involving text preprocessing, classification, feature engineering, and model evaluation using Python and Scikit-learn.
- Implemented end-to-end ML workflows with preprocessing, model selection, and optimization techniques.

Galgotias College of Engineering and Technology

Summer Intern – Data Science with Python

Greater Noida

1 Month

- Completed 20 machine learning and deep learning projects using Python, Scikit-learn, TensorFlow, Keras, NumPy, and Pandas across tabular, image, text, and sequential data.
- Built ANN, CNN, RNN, and LSTM models for classification, computer vision, NLP, sequence prediction, and time-series forecasting.

Projects

CreditRisk AI | Python, XGBoost, Streamlit, FastAPI

GitHub | Live Demo

- Built a production-style credit risk scoring SaaS using 307K+ borrower records and 324 engineered features from six Home Credit datasets.
- Achieved ROC-AUC of 0.781 with XGBoost and implemented threshold optimization, batch scoring, monitoring, audit logging, and fairness reports.

ChurnGuard AI | Python, Scikit-learn, Streamlit, SQLite

GitHub | Live Demo

- Developed a customer retention analytics SaaS using 7,043 telecom records; achieved 92.5% recall and 0.841 ROC-AUC with balanced Logistic Regression.
- Implemented batch scoring, model explanations, drift monitoring, API-key management, and GitHub Actions CI.

PathPilot AI | Next.js, Node.js, Express, MongoDB

GitHub | Live Demo

- Built an adaptive learning platform with personalized recommendations and cohort analytics to identify weak topics and at-risk learners.
- Implemented JWT authentication, role-based access control, MongoDB persistence, and REST APIs.

Technical Skills

Languages: Python, C++, Java, SQL, JavaScript, Dart

Machine Learning: Scikit-learn, XGBoost, Pandas, NumPy, Feature Engineering, Classification, Regression, Model Evaluation, Time Series

Deep Learning: TensorFlow, Keras, ANN, CNN, RNN, LSTM, NLP, Computer Vision

Development: FastAPI, Flask, Streamlit, Node.js, Express.js, Next.js, React, Flutter, REST APIs

Databases & Tools: MongoDB, Firebase, Firestore, SQLite, Git, GitHub Actions, Postman, Tableau, Power BI

Certifications & Achievements

- Completed job simulations at **Deloitte** (Data Analytics) and **Tata** (GenAI-Powered Data Analytics, Cybersecurity Analyst) via Forage.
- Career Essentials certifications in Generative AI, Data Analysis, and Cybersecurity – Microsoft & LinkedIn; Oracle Cloud Infrastructure 2025 AI Foundations Associate.
- Participated in 8+ hackathons; secured finalist position in 3+, including IEEE MAIT Agentic AI Hackathon; solved 350+ DSA problems.
