

Hemant Kumar

AI & Data Science Undergraduate

+91 9319695061 | hemanttkumar21@gmail.com

1652/54E, Molarband Extension, Badarpur Border, New Delhi – 110044

LinkedIn | GitHub | Portfolio

Education

Galgotias College of Engineering and Technology

B.Tech in Artificial Intelligence and Data Science (CGPA: 7.75)

BMVB-ASMA, GK-2 (CBSE)

Class XII: 90%

Class X: 92.4%

Greater Noida

2024 – Present

New Delhi

2023

Technical Skills

Languages: Python, C++, Java, SQL, JavaScript, Dart

Machine Learning: Scikit-learn, XGBoost, Pandas, NumPy, NLP, Feature Engineering, Model Evaluation

Backend: Flask, FastAPI, Node.js, Express.js, REST APIs, JWT Authentication

Frontend: Flutter, React, Next.js, Streamlit

Databases: MongoDB, Firebase, Firestore, SQLite, Cloudinary

Tools: Git, GitHub, GitHub Actions, Postman, Tableau, Power BI

Experience

Prodigy InfoTech

Data Science Intern

Remote

Jul 2025 – Aug 2025

- Developed ML solutions involving preprocessing, feature engineering and predictive analytics.
- Built classification and regression models using Python, Pandas, NumPy and Scikit-learn.
- Performed visualization and business-focused performance analysis.

CodSoft

Artificial Intelligence Intern

Remote

Jul 2025 – Aug 2025

- Built AI and NLP applications involving text preprocessing and classification.
- Implemented end-to-end ML pipelines using Scikit-learn.
- Applied feature engineering and optimization techniques.

Projects

CreditRisk AI | Python, XGBoost, Streamlit, FastAPI

Live | GitHub

- Built a production-grade credit risk SaaS using the Home Credit dataset with 307K+ borrower records and 324 engineered features.
- Trained and evaluated Logistic Regression, Random Forest and XGBoost models, achieving a ROC-AUC of 0.781.
- Implemented batch loan scoring, threshold tuning, applicant review dashboard and downloadable audit reports.
- Developed monitoring dashboard, fairness analysis and FastAPI endpoints to simulate production ML deployment.

ChurnGuard AI | Python, Streamlit, Scikit-learn, SQLite

Live | GitHub

- Built a customer retention analytics SaaS using IBM Telco Customer Churn data with end-to-end ML pipeline.
- Achieved 92.5% Recall and ROC-AUC of 0.841 using Balanced Logistic Regression with ROI-based threshold optimization.
- Implemented batch prediction, prediction explanations, drift monitoring, API key management and subscription plans.
- Integrated SQLite workspace management, GitHub Actions CI and downloadable prediction reports.

PathPilot AI | Next.js, Node.js, Express.js, MongoDB

Live | GitHub

- Developed a full-stack adaptive learning platform with secure JWT authentication and role-based dashboards.
- Built a recommendation engine that analyzes learner performance to suggest personalized learning paths.
- Implemented instructor analytics, progress tracking, activity timelines and CSV export for cohort monitoring.
- Designed REST APIs with Express.js and MongoDB supporting learner activity, recommendations and analytics.

FOUNDIT | Flutter, Firebase, Riverpod, Cloudinary

Live | GitHub

- Built a cross-platform Lost & Found application for campus communities using Flutter and Firebase.
- Implemented Google OAuth authentication, Firestore integration and Cloudinary image uploads.
- Developed smart search, real-time updates, admin moderation dashboard and WhatsApp contact integration.
- Designed responsive mobile and web interfaces with Riverpod state management and Firebase Hosting deployment.

Certifications

- Oracle Cloud Infrastructure 2025 AI Foundations Associate
- Deloitte Data Analytics Job Simulation
- TATA GenAI Powered Data Analytics Simulation
- Career Essentials in Generative AI by Microsoft & LinkedIn
